

Full Featured With Versatility and Value

Imagine having a single solution that provides a complete unified messaging system which includes voice processing, voice messaging, fax and e-mail integration.

A solution that is full featured and has the versatility to offer a cost effective entry point into unified messaging, no matter what type of telephone system or e-mail software you have. At a price point that makes sense for any size business, while providing the best value in the industry. Imagine a world in which you never miss opportunities because you can now respond faster to your customers' requests.

That's the power of Active Voice's **Repartini** Unified Messaging System.

The Freedom of Unified Messaging

Repartini offers advanced unified messaging, voice mail and automated attendant functionality, helping your organization become more responsive. Designed to work with the applications you use daily; Repartini integrates with Microsoft Outlook, Novell GroupWise, Lotus Notes, and IMAP/SMTP E-Mail Accounts as well as leading smart phones such as Blackberry and iPhone. Web access and administration are standard features, as well as full featured auto-attendant and voice processing.

Redefining Unified Messaging

Advanced notification features alert employees to messages with varying priority. Mobile users will find it as easy to communicate on the road as in the office. As a result, there will be an increase in productivity, acceleration in response times and improved customer service as employees stay more connected.

Key features included in Repartini are:

- Accessibility to voicemail via RSS Feeds
- ActiveSuite Client Applications
- Smartphone PDA support

Repartini is a complete Unified Messaging system in a network appliance form factor that is built upon a proven software code and the Linux operating system, offering SMBs the best value in the industry.
